

# VACUUM ISO COMPONENTS

---

- Adaptors.....€ 11

There are four different configurations to fit together ISO flanges.

Figure 1 illustrates the double claw-clamp assembly which is the most commonly used configuration.

Figure 2 shows the wall clamp assembly where a claw-clamp flange is mounted to a rotatable bolt ring. This assembly combines the claw-clamp flange and bolt flanges with nuts and bolts. The rotatable bolt ring and fixed bolted assembly is shown in figure 3. The rotatable bolt ring consists of a rotatable outer ring and a split retainer ring to hold the claw-clamp in place. Finally configuration 4 shows a bolted fixed flange and a tapped flange, or chamber wall for example.

All four configurations use an O-ring seal held in place by a centering ring. This is effective down to  $10^{-7}$  mbar. With Viton O-ring assemblies bakeable to 200°C (sustained 150°C).

The ISO range of flanges and fittings are manufactured from high quality 316L (1.4404) Stainless Steel\*.

All given dimensions are nominal in mm.

\*304L (1.4306) available on request.
